TECHNICAL SHEET

ACTIVAL

EMULSION FOR PREPARING AND WASHING OFFSET PRINTING PLATES

ACTIVE FORMULA

CHARACTERISTICS:

Solution aimed at removing surface oxidation from NOT printing areas and at regenerating printing areas of grained and anodized aluminium plates.

The newly developed formula allows to remove even persistent background fogs which may occur due to a not perfect preparation of the positive or negative plate.

Particularly suitable to prepare stored plates before printing.

APPLICATION:

Apply the product with a humid sponge on the interested areas.
Wash off with water. SHAKE ALWAYS WELL BEFORE USE.

TECHNICAL DATA:

PHYSICAL STATE:

Liquid

COLOUR:

Pinky

pH

1

ODOUR:

Typical

BOILING POINT:

200° C

FLASH POINT:

63° C

WATER SOLUBILITY:

Water emulsifiable

PRECAUTIONS:

Specific product for analogue baked plates to be used, anyhow, with caution. Use it with digital plates, only if they have been baked.

With NOT baked digital plates, we recommend to use our product PREPARCLEANER A 21.

Since the product is slightly abrasive, do NOT wipe excessively during use.

PACKING:

Carton containing 6 cans of 2 litres
